

FPM-Trinity: 3D Printing & CAD Flow

26th Oct 2023

Naohiko Hiramatsu

Process engineer

Development center

FUJI Corporation

Foundation

April 1959

65 years

Number of employees*

2,848 people

Net sales

FY2023

153 billion yen

Overseas sales ratio

FY2023

90%

Operating profit ratio

FY2023

17.7%

ROE

FY2023

9.4%

Market capitalization*

215 billion yen

Equity ratio*

89%

Dividend payout ratio

FY2023

37.7%

The data marked with * is accurate as of March 31, 2023.

60,000 cph per robot

1. What is the value that AM provides?
2. Why can FPM-Trinity manufacture substrates so quickly?
 - Manufacturing processes of the printing and SMD P&P
 - CAD data flow
3. Why does FPM-Trinity make it easy to create 3D shape?
4. Summary

1. **What is the value that AM provides?**
2. Why can FPM-Trinity manufacture substrates so quickly?
 - Manufacturing processes of the printing and SMD P&P
 - CAD data flow
3. Why does FPM-Trinity make it easy to create 3D shape?
4. Summary

Speedy development

24Hr

Freely design

3D shape board

1. What is the value that AM provides?
2. **Why can FPM-Trinity manufacture substrates so quickly?**
 - Manufacturing processes of the printing and SMD P&P**
 - CAD data flow
3. Why does FPM-Trinity make it easy to create 3D shapes?
4. Summary

Integrated **AME** + **SMT**

Parts placement

- Parts mounting head
- Vision system

Parts supply

- Alternative unit for feeder and tray

Inkjet heads

- UV resin ink
- Ag nano ink

Post printing process

- IR Heater
- UV exposure

Air dispensers

- Ag paste
- Epoxy glue paste

Post parts placement process

- Press heater

①

- Resin ink printing
- UV exposure

- Ag nano ink printing
- Drying and Sintering

- Iteration of resin and Ag formation

②

- Printing Ag paste bump

③

- Printing epoxy glue paste under SMDs

④

- SMD pick & placement
- Press curing

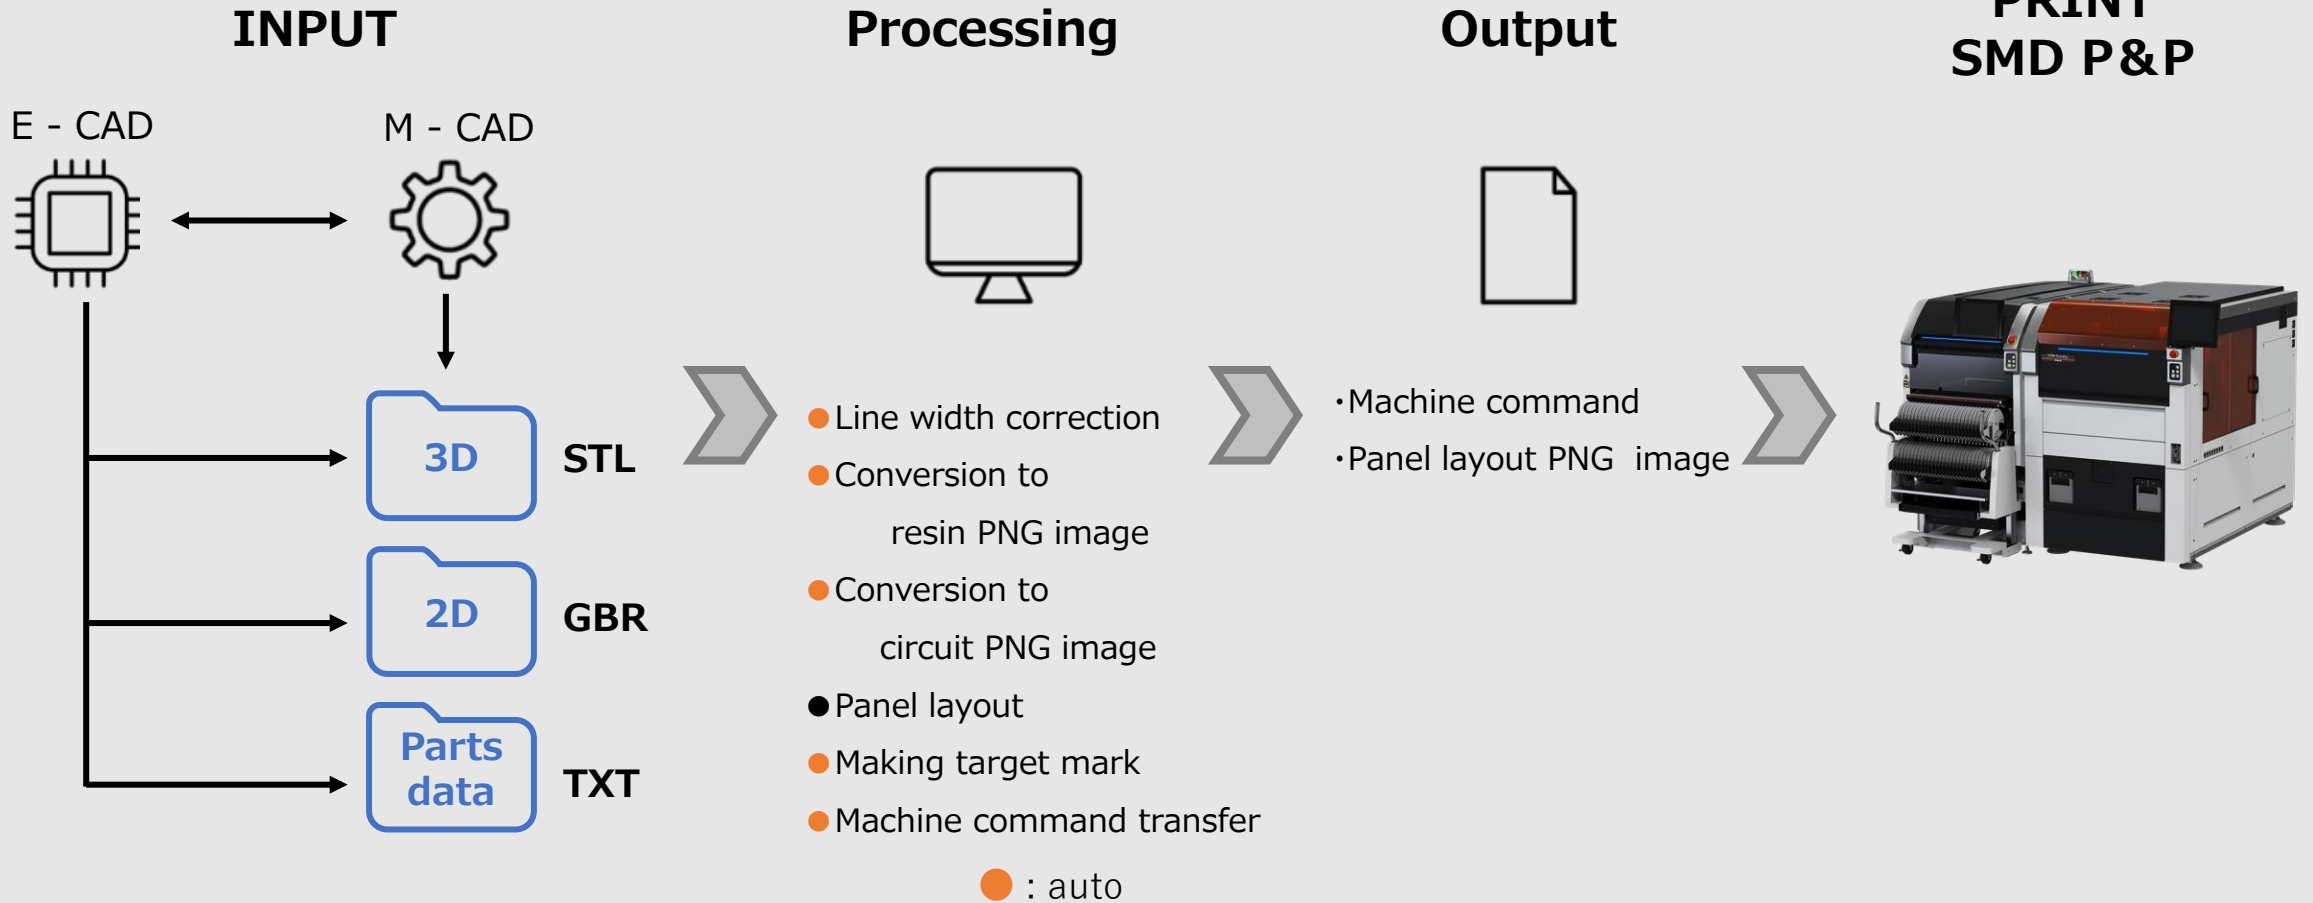

⑤

- Printing epoxy glue paste around SMDs

1. What is the value that AM provides?
2. **Why can FPM-Trinity manufacture substrates so quickly?**
 - Manufacturing processes of the printing and SMD P&P
 - CAD data flow**
3. Why does FPM-Trinity make it easy to create 3D shapes?
4. Summary

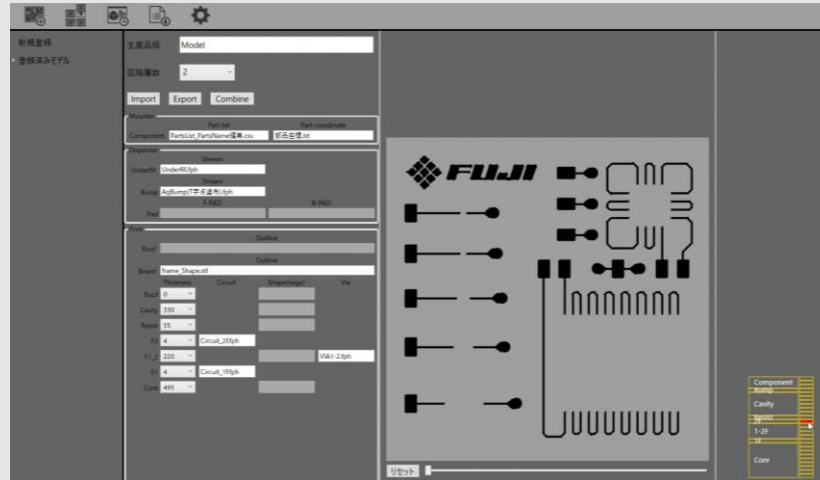

Drag and drop

- Gaber data
- STL data
- Parts information

Conversion to PNG automatically

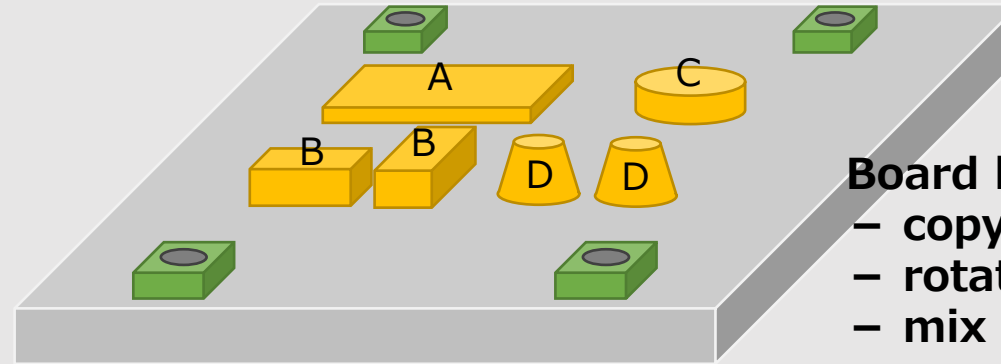

The registered board

Trinity Host App "board layout" and transfer data

Target marks are automatically generated.

- Board layout**
- copy designs
 - rotate designs
 - mix different designs

The registered board

Free board layout

Machine command

Panel layout PNG image

Transfer data to FPM-Trinity

1. What is the value that AM provides?
2. Why can FPM-Trinity manufacture substrates so quickly?
 - Manufacturing processes of the printing and SMD P&P
 - CAD data flow
3. **Why does FPM-Trinity make it easy to create 3D shape?**
4. Summary

3D shape that FPM-Trinity can create

Adding spacers and openings

Embedding parts into the board

Three-dimensional placement of parts

The process of creating 3D shape by FPM-Trinity

① 1st SMT

③ Printing Ag ink

⑤ 2nd SMT

② Printing resin

④ Ag paste filling

Why does FPM-Trinity make it easy to create 3D shape?

① 1st SMT

② Printing Resin

③ Flattening

④ Repeat(②→③)

Flat even above the part

Why does FPM-Trinity make it easy to create 3D shape?

1. What is the value that AM provides?
2. Why can FPM-Trinity manufacture substrates so quickly?
the processes of the printing and P&P SMD
Cad data flow
3. Why is it so easy to create 3D shapes?
4. Summary

Designing and improvement

Sample manufacturing

Sleeping for next ideas

Testing of samples

- All in ONE !
- ONE stop !
- Within ONE day !
- From ONE piece !
- From ONE person !
